

CEILING

ceiling recessed rail system

The most discreet hanging system currently available.

The rail is attached to ceiling joists from wall to wall during construction. Set into the ceiling and wall with the plaster sheet overlaid, it creates both a shadowline effect and a hanging rail system. Far superior finish to other shadowline trims.

An excellent choice for those wanting sleek lines and a concealed hanging system with minimal visual impact.

Best installed by a professional Plasterer or Builder. Not recommended as a DIY installation.

- ✓ Size 65mm w x 14mm h
- ✓ Suited to 10-13mm plasterboard ceilings
- ✓ Least visible hanging system on the market
- ✓ Semi recessed at construction stage
- ✓ Creates a ceiling shadowline effect
- ✓ Suitable for plasterboard or rendered wall
- ✓ No tools required to hang pictures
- ✓ Excellent clip in/clip out hanging kits
